*Amherst College*

Ann Seidman  
*Brown University*

The Association is alive and functioning at a very critical time and we need your continued support.

We have solved some of the initial organization problems and are now regularly producing a newsletter. Our political action and research committees are working. A Conference on arms aid to South Africa has been held with a book published of the findings and another conference is planned on Namibia for this coming Spring. Our first regular annual meeting is set for Howard Univ. May 19-20.

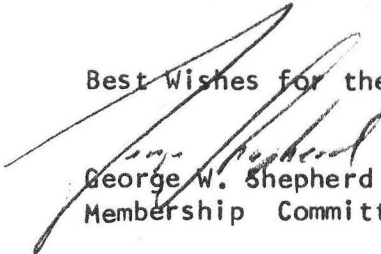

In short ACAS provides the most direct way for policy concerned scholars and Africanists to exert their influence on events and policy. We hope you will continue to assist in this active use of specialized knowledge.

We do not have any foundation or large donor support. This is a membership organization which exists through the concern and contributions of its associates. The new dues structure reflects the professional level at which we are now functioning. The budget is expended not in overhead but in direct functions.

\*

Send your dues according to the enclosed structure to the T. Shick address. Also plan to participate by attending the annual meeting at Howard Univ. May 19-20.

Best Wishes for the New Year,

  
George W. Shepherd Jr., Co-Chm.  
Membership Committee

\* If sent, our apologies.
